

I believe in XM radio and how it has helped me through the past year in making my driving safer and more comfortable. When I use my XM radio on long trips - I have time to keep my EYES on the road and not fumbling thru countless radio stations trying to keep me calm in areas driving. I put it on one station and never have to change. XM radio is a safer way for ppl to drive. Plus with the weather updates in most cities and traffic reports - I get home quicker - A major plus is saving gas - (not sitting in stand still traffic)
